FRONT-END DEVELOPER

Frontend Developer with a background in game programming, experienced in building responsive and interactive web applications using modern technologies such as React, Next.js, and Tailwind CSS. Combines strong problem-solving skills from game development with a focus on clean, scalable, and user-centered interface design. Demonstrates initiative in translating high-level requirements into functional products, with a growing understanding of backend integration and system logic. Adaptable, collaborative, and continuously learning to deliver impactful digital experiences.

EXPERIENCE

PT Ciptadra Softindo | Web Developer

February 2026 - June 2026

- Delivered 6–7 web redesign projects in a fast-paced, sprint-driven environment, significantly improving visual quality and user experience.
- Took ownership in transforming broad requirements into modern, conversion-focused interfaces.
- Combined UI/UX design with copywriting to create clearer, more engaging user interactions.
- Operated as a creative engineer, balancing design, functionality, and usability in real-world projects.
- Demonstrated strong adaptability and problem-solving by consistently delivering under tight timelines.

Projects:

- Mall Management System | CodeIgniter, PHP, MySQL, CSS**

Engineered a web-based mall management system to streamline tenant administration, contract handling, and automated billing, significantly improving operational efficiency.

- Landing Page (Mall Management System) | CodeIgniter, PHP, CSS, Vanilla JS**

Designed and implemented an optimized landing page for the management system, focusing on user experience and effective conversion.

- Company Profile Website | Laravel, PHP, Vanilla JS, CSS**

Led the redesign and development of the corporate website to elevate digital branding and deliver a modern, responsive user interface.

Game Technology Student Association, Polimedia | Head of the Human Resources Development Division (PSDM)

January 2024 - December 2025

- Coordinated development activities and addressed internal organizational issues.
- Assisted in the recruitment and evaluation process of new members.
- Implemented programs aimed at enhancing members' knowledge and professional development.

PROJECTS

FoodCheck – Recipe Finder Web App

Fullstack web application to search recipes based on available ingredients using external API integration (Spoonacular). Built responsive and interactive UI using React.

Angular SPA – Single Page Application

Single Page Application using Angular, implementing reactive forms and client-side validation. Integrated external APIs. Focused on structured component architecture and scalable frontend logic.

EDUCATION

Politeknik Negeri Media Kreatif Jakarta

D4 Game Technology 2023 – Present

Relevant Coursework:

Programming Fundamentals, Object-Oriented Programming, Data Structures & Algorithms, Database Systems, Human-Computer Interaction, Software Engineering, Artificial Intelligence, Applied Mathematics
